

# **THE INDIAN METHOD**

**A Step-By-Step guide**

## What is the indian method?

- The "Indian method" is just the typical outsourcing .

What is an example of outsourcing?

One example of outsourcing is in China with companies like Apple. Apple outsources the manufacturing of its products, such as iPhones, to chinese manufacturers .They have the capability to produce products on a large scale and at a lower cost than if Apple were to produce them in-house. Basically a lot of work for way cheaper, but do not worry. You don't have to exploit your workers like that. You can in fact help them by not only giving them a job but paying them way better.

# How does it work?

Let's talk about how it all actually works...

The first thing you will need is basic VPN. Also a registration on one of the many sites for freelance services, or your own thing (UpWork, Fiverr, Toptal..) You will have to choose two sites or two different registrations. The first is to offer your services, and the second will be with the VPN (preferably from two different devices)

It really is that  
simple.

## **Examples of what these people can do for you:**

- Writing(copywriter  
translation,editor  
proofread.....)
- Design
- Editing
- PPC (Pay-Per-  
Click) advertising
- email marketing.

THEY CAN DO  
ANYTHING

Example:

In your professional-looking profile, you pretend to be a specialist in something. (whatever you chose)

Finally, there is a person who is interested in your service and becomes your client. This service of yours costs for example 80 dollars. Very easily and quickly with VPN you find an Indian, Chinese etc. who is going to do that job for 4 dollars

When they're done they send it, and you pay them \$4 and then you send it to the original customer. You get the difference (which is \$76) doing next to nothing and everyone is happy.

Thank you so much for purchasing my ebook .

I hope it helps you achieve your financial goals and that you find success in your online endeavors. Wishing you the best of luck and much success!

Thank you!
