Here at Vestibular First, we are excited to share our knowledge and passion for the anatomy that makes up the vestibular system! Combining this knowledge with technology is at the heart of our company. There are only a limited amount of high-quality 3D models of the inner ear available, and none that are specific to the vestibular apparatus--so we re-mixed and re-modeled some publicly available models to suit the needs of educators, clinicians, and educators.

If you would like to support our affordable and empowering vestibular technologies, let our team make this model for you. To learn more, please visit us at <https://vestibularfirst.com/store/3d-vestibular-apparatus-model-for-education/>
